

Request for Proposals
Audio/Visual in Emergency Operations Center
Watauga County

Watauga County Information Technology is accepting proposals for an A/V system for the Emergency Operations Center (EOC) located in the County's new Emergency Services Center.

Please find floor plan below.

All equipment will need to terminate into a wall rack (mounted near the ceiling) in the storage closet in the back of the room.

Requirements:

- All cable pulled by the vendor
- Rack(s) installed by vendor mounted high on the wall in the closet in the rear of the room to allow for the closet to be used for storage as well
- 3 large televisions across the front of the room – all capable of displaying a computer screen (all mirrored or separate inputs). Center screen will also need to be able to display cable television input.
- All 3 televisions in the front should be Promethean brand or similar smart board TV
- 1 large television on each side of the room to either display their own computer source or mirror input that is being sent to the screens in the front of the room.
- Podium with microphone and an A/V input for presentations on all monitors (floor boxes are available)
- Overhead speakers to transmit audio from either the front, center television or from the podium.
- Microphone and camera (facing front of room) for use for video conferencing platforms
- All monitors capable of being controlled by a single device where each monitor can display a different input
- Ability to easily connect a laptop to any of the displays directly
- Training of staff once installation is complete

Proposals will be accepted until December 19, 2025
